# BIO-ENZYME 500

## ENZYME BASED DRAIN CLEANER

**Bio-enzyme 500** Is an enzyme based drain cleaner and grease trap maintainer. It is a blend of enzymes and dormant bacteria that work by natural principles to break down organic matter safely and efficiently into liquid waste. Regular use of Bio-enzyme 500 will result in clean, odourless grease traps, drains and sinks. Bio-enzyme 500 is safe to use and will not damage plumbing.

### FEATURES

### BENEFITS

✓	<b>Efficient</b>	<b>One treatment can clear an entire length of pipe.</b>
✓	<b>Economical</b>	<b>Small amount required- Big savings on maintenance costs.</b>
✓	<b>Contains Activated Enzymes</b>	<b>Digests and liquefies starch, protein, fat, grease and other organic matter to keep drains free flowing.</b>
✓	<b>Self Generating</b>	<b>“Self-Reproducing” power increases with the demands to combat grease and waste</b>
✓	<b>Cleans, Deodorises and Maintains</b>	<b>Reduces blockages and rodding. Helps to eliminate odours. One product to solve several drain problems.</b>
✓	<b>Easy to Use</b>	<b>Liquid formulation can be dispensed quickly and easily.</b>
✓	<b>Safe</b>	<b>No harmful ingredients – No damage to plumbing.</b>
✓	<b>Bio degradable</b>	<b>Continues to break down in water so will cause no harm to environment.</b>

**Bio-enzyme 500** Should be used to clean and maintain grease traps, septic tanks, cess pits, sink waste pipes, sewage plants, drains, sinks, etc.

**Bio-enzyme 500** Can be used in Food Factories, Food Processors, Restaurants, Hotels, Hospitals or anywhere drains or grease traps are a problem.

**Bio-enzyme 500** Should be applied as follows: Based on a 40 litre Greasetrap

Grease Traps:

For best result clean out prior to treatment then add an initial purge treatment of approx. 350 ml per night for the first week. Thereafter maintain with approx. 250 ml per night.

Septic Tanks:

Add 600 ml per week.  
Where severe problems exist increase frequency of use.
