

Best Engineering (Service Division) Ltd

Level Detection & Measurement

Most liquid storage tanks have some type of level indication. These gauges perform a vital role in indicating the contents level, and in some cases actuating low or high level alarms.

We select equipment from a range of leading manufactures to ensure that we provide a tailored solution to your requirements, that is accurate, reliable, efficient and cost effective.

Our scope of supply extends from simple gauge glasses to market leading radar technology. In addition to the instrument we can also provide local & remote control and alarm panels.

Point Level Detection

- Horizontal magnetic level switches
- Vertical magnetic level switches
- Ultrasonic level sensors
- Vibrating fork level sensors
- Reed level switches
- Conductivity level probes

Level Measurement & Control Systems

- Hydrostatic contents gauges, self powered
- Non-contacting ultrasonic level transmitters
- Smart displacer type level transmitters
- Electronic pressure transmitters
- Non-contacting & guided wave radar
- Magnetostrictive level transmitters
- Magnetic bypass indicators
- Reed switch chain technology
- Capacitance level probes

Applications

- Tank content
- Pump control
- Low level alarm
- High level alarm
- Overfill protection
- Leak detection
