#### Description

The CONSTAFLO is a simple water flow controller using a patented device that ensures the maintaining of flow rates with  $\pm 10\%$  of its rated capacity when operating within the limits of temperature and pressure specified in the 'Maximum Working Pressure' section.

---

#### Operation

A Neoprene diaphragm - working in conjunction with a profiled orifice - when subjected to pressure differences between 15 and 200psi (1.06 and 14kg/cm<sup>2</sup>) flexes on to the orifice to vary the orifice area, so maintaining a rate of flow irrespective of varying upstream or downstream pressures, within the operating range of the unit. An initial pressure drop of 15psi (1.06kg/cm<sup>2</sup>) is necessary before the unit reaches control point.

---

#### Maximum Working Pressure (MWP)

Max. Working Pressure: 200psi (14kg/cm<sup>2</sup>)

Max. Working Temperature: 65 °C

Min. Working Temperature : 1 °C

Max. Pressure Difference: 200psi (14kg/cm<sup>2</sup>)

Min. Pressure Difference: 15psi (1.06kg/cm<sup>2</sup>)

Accuracy  $\pm 10\%$  when operating in the range 15 to 200psi (1.06 to 14kg/cm<sup>2</sup>) pressure difference.
