Damcos[™] Solenoid Operated Directional Control Valves

General Description and Application Advantages

Basically, these solenoid operated directional control valves are for directing and stopping flow at any point in a hydraulic system.

- Efficient control of greater hydraulic powers without increasing solenoid power consumption.
- Installed cost and space savings from higher power/ weightand-size ratio.
- Reduced internal leakage reduces power losses, increases system efficiency: the result of improved manufacture of spools and bores.
- Installation flexibility resulting from choice of numerous combinations of solenoid connectors and locations.
- Multi-fluid capability without need to change seals.
- Higher sustained machine productivity and higher up-time because of proven fatigue life and endurance, tested over 20 million cycles.

All valves are delivered with manual push-button for local override.

Versions

Type C6S:

4-way, 3-position directional valve, with two solenoids; positioning of spool at rest is obtained with centring springs.

Type A3X/H3X

4-way, 2-position directional valve, with one solenoid; spool position at rest is obtained with a return spring.

Type E3X:

4-way, 2 -position directional valve, with two solenoids; with mechanical detent of the extreme spool positions when solenoids are de-energized.

Performance ratings

(Working with mineral oil of viscosity of 36 cSt at 50°C)

Maximum working pressure				
Ports P A B	350 bar			
Port T	140 bar			
Maximum flow rate				
From port P to A or B	80 l/min			
From port A or B to T	80 l/min			
Ambient temperature range	-20°C to +60°C			
Fluid temperature range	-20°C to +70°C			
Fluid viscosity range	15-300 cSt			
Recommended filtration	$\leq 25 \mu m$ absolute			
Burst pressure	680 bar			
Mass				
Double	2.0 kg 1.8 (AC) 2.0 (DC)			
Single	1.5 kg 1.4 (AC) 1.5 (DC)			

Operating Limits

The curves define the flow rate operating fields according to the solenoid valve pressure with DC and AC solenoids. The values have been obtained with 36 cSt, temperature 50° C, filtration 25μ m and with solenoids at rated temperature and supplied with voltage equal to 90% of the nominal voltage.
